

Backend Team Meeting Agenda

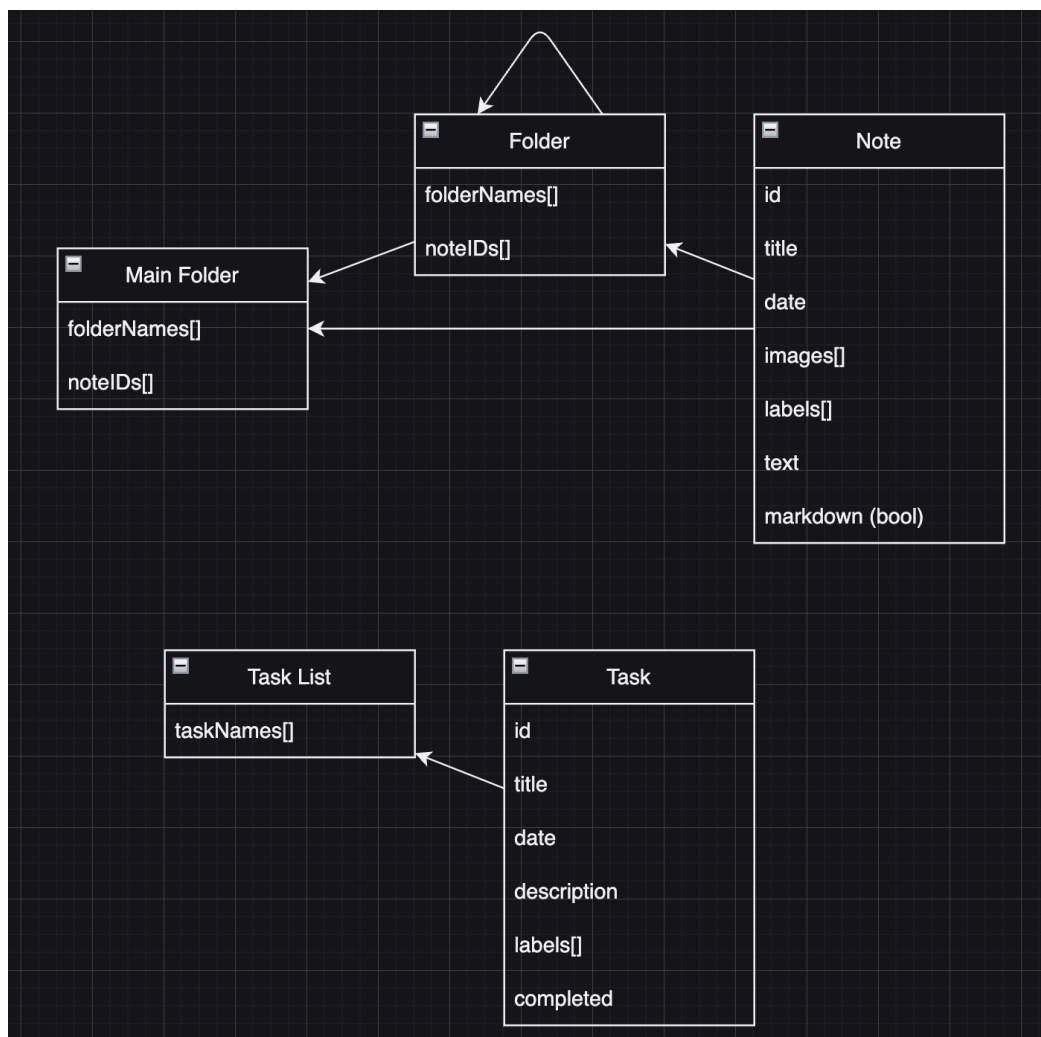

- **Date:** 5/15/2024
- **Time:** 5PM-5:15PM
- **Location:** CSE Building

Agenda

1. Finalize schema

Meeting Notes

- **Type:** Backend Meeting Week 7
- **Attendance:**
 - **Present:**
 1. Theodore
 2. Nam
 3. Jeremy
 4. Purich
 - **Absent:**
- **Notes:**
 - Schema was discussed and agreed upon.

- A main folder that gets pulled when the page loads, and has either subfolders or notes. Subfolders can also have either more folders or notes.

- Each note (or task) will have a unique ID attached, preferably with some marker to differentiate them, such as notes are N# and tasks are T#
- A title, the date (of creation for notes, due date for tasks), and any labels.
- Images we are trying to figure out how to store since we can only store strings.
- The text/description for the note/task. For Task, completed is a boolean of if the task is completed or not
- For Note, we were a little unsure of how we will be implementing the markdown, but assuming you can 'set' a note as markdown or plaintext, the markdown variable is whether or not the file is a markdown file or not.

- **Items for Future Investigation:**

- Markdown integration possibilities
 - Integrating both plaintext and markdown in the same file

Next Meeting

- **Date:** 5/22/2024
- **Time:** 5PM
- **Location:** CSE Building
- **Goals:** TBD
